Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-5, drawn to a plurality of wiring levels each at different grid density, classified in class 716, subclass 13.
- II. Claims 6-26, drawn to partitioning, classified in class 716, subclass 7.
- III. Claims 27-29, drawn to routing with a graph, classified in class 716, subclass 12.
- IV. Claims 30-35, drawn to routing with nodes for positioning objects, classified in class 716, subclass 12.
- V. Claims 36-40, drawn to shifting nodes, classified in class 716, subclass 2.
- VI. Claims 41-50, drawn to routing within a volume, classified in class 716, subclass 12.
- VII. Claims 51-56, drawn to channel routing, classified in class 716, subclass 14.
- VIII. Claims 57-59, drawn to a plurality of routing algorithms, classified in class 716, subclass 12.
- IX. Claims 60-63, drawn to routing pitch based on design rule violations, classified in class 716, subclass 11.
- X. Claims 64-69, drawn to threads of multi-processing, classified in class 716, subclass 12.

The inventions are distinct, each from the other because of the following reasons:

The inventions are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, the inventions have separate utility as identified above. See MPEP § 806.05(d).

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
